PROJECTS

Star Setup | github.com/star-setup

Rust, CMake, Python, Homebrew

- Rust CLI that clones, configures, and wires single- and multi-repo ecosystems.
- Distributed across three package managers via cargo-dist for Homebrew and npm, and a Python wrapper published to PyPI.

GitHub Top Languages | github.com/gh-top-languages

TypeScript, Node.js, Vercel, Vitest

- API generating embeddable SVG language charts with themes, custom colours, and response caching to manage GitHub API rate limits.
- Shared rendering library published to npm, plus an interactive builder for previewing and exporting configurations. Live on masonletoile.ca and in my GitHub profile README.

Contact API | github.com/contact-api

TypeScript, Node.js, Vercel, Vitest

- Platform-agnostic contact-form backend published to npm: CORS evaluation, input validation, honeypot handling, and email orchestration.
- Swappable email providers (Resend, Nodemailer) behind a single interface; Vercel adapter adds WAF rate limiting. Serves the live form on masonletoile.ca.

Looking For Love | github.com/masonlet/looking-for-love

Next.js, TypeScript, Supabase, Tailwind, Vitest

- Five-person team build of an IT-themed matching platform with Supabase Auth, preference-based matching, and role-based paid tiers.

Starlet Libraries | github.com/starlet-libs

C++, OpenGL, CMake, GoogleTest, GLFW

- Modular C++/OpenGL engine split into independently tested libraries: ECS scene management, graphics, math, input, serialization, and logging.

EXPERIENCE

Courtland Landscape & Grounds, Tillsonburg

Mechanic – May, 2023 - August 2023

Groundskeeper – Summer 2020 & 2021

Canadian Tire, Tillsonburg

Service Technician – June, 2022 - November 2022

PROGRAMMING

Primary:

- TypeScript, C++, Rust, Python

Coursework:

- C#, Java, SQL

Web:

- HTML/CSS, Node.js, Next.js, Vite

Testing:

- Vitest, GoogleTest, PyTest

Tools:

- Git, CMake, Vercel, Cloudflare, Supabase

LANGUAGES

- English, Fluent

EDUCATION

Fanshawe College, London

Computer Programming and Analysis

September 2023 - December 2026

Fanshawe College, London

Motive Power Tech (Diesel)

September 2022 - April 2023
